CrowdStrike Named a Customers' Choice in the 2025 Gartner® Peer Insights™ 'Voice of the Customer' for Endpoint Protection Platforms Report

May 27, 2025

CrowdStrike has the most 5-star ratings (450) of any Customers' Choice vendor in the Endpoint Protection Platforms report; only vendor named a Customers' Choice in every iteration of the Voice of the Customer for EPP report since its inception in 2019, being recognized five times

AUSTIN, Texas--(BUSINESS WIRE)--May 27, 2025-- CrowdStrike (NASDAQ: CRWD) today announced its recognition as a Customers' Choice in the 2025 Gartner Peer Insights™ 'Voice of the Customer' for Endpoint Protection Platforms report[1]. CrowdStrike has the most 5-star ratings (450) of any Customers' Choice vendor and has a 97% Willingness to Recommend score, based on 601 overall responses as of January 2025. CrowdStrike is the only vendor named a Customers' Choice in every iteration of the Voice of the Customer for Endpoint Protection Platforms report since its inception in 2019, being recognized five times.

"As the pioneer of AI-native endpoint protection, CrowdStrike continues to define modern security, driving relentless innovation across every area of enterprise risk to meet evolving customer needs," said Elia Zaitsev, chief technology officer, CrowdStrike. "The Falcon platform is the only AI-native platform that unifies endpoint, identity, cloud and Next-Gen SIEM, eliminating point-product sprawl and accelerating response times. Customers trust CrowdStrike because we deliver the security outcomes that matter most: stopping breaches, removing complexity and cost, and giving security teams the speed and insight needed to outpace adversaries. We feel this recognition from customers validates the Falcon platform as *the* choice for organizations replacing legacy security stacks with AI-driven, automated protection."

What Customers Are Saying

Here is a sampling of our reviews:

- **CrowdStrike Falcon: Resetting Cybersecurity Standards:** "CrowdStrike Falcon is a highly effective and robust cybersecurity solution that offers unparalleled protection against advanced threats. Its cloud-native architecture, AI-powered detection, and ease of use make it a top organizational choice for all sizes." – IT Security and Risk Management, Banking Industry
- **Multi-OS Support with CrowdStrike's Unified Interface:** "CrowdStrike makes it quite convenient to protect all your endpoints through a unified interface. Falcon host sensor software is supported across Windows, macOS, and Linux, which is especially useful if you have a multi-OS environment." – Operations Team Lead, Transportation Industry
- **Comprehensive Security, Seamless Integration with Existing Systems and Exceptional Support:** "Overall, an outstanding experience with excellent product capabilities and service." – IT Security & Risk Management Associate, IT Services Industry

Why Our Customers Choose CrowdStrike

As the pioneer of AI-native endpoint security, CrowdStrike continues to deliver the platform innovation organizations need to stop evolving threats, unifying best-in-class endpoint, cloud, identity and data protection. Consistently recognized by both customers and the industry, the CrowdStrike Falcon® platform delivers:

- **AI-Powered Protection**: CrowdStrike leads the industry in AI-driven detection and response. The Falcon platform continuously analyzes behaviors, automates response and delivers real-time threat prevention across the entire attack surface. With innovations like CrowdStrike Signal, a new family of AI-powered engines that intelligently groups related security events and alerts into actionable insights with a self-learning model tailored to specific environments, analysts will improve efficiency and reduce the risk of missed detections. Coupled with Charlotte AI Agentic Detection Triage and Charlotte AI Agentic Response and Agentic Workflows, CrowdStrike's Charlotte AI transcends "ask-and-respond" copilots – delivering autonomous reasoning and action on first- and third-party data, enabling security teams to detect, prioritize and respond faster than ever.
- **Cross-Domain Protection:** Modern attacks don't stop at the endpoint – adversaries exploit security gaps between endpoint, identity and cloud to move across domains and evade traditional detection methods. The Falcon platform correlates threats across these domains in real time, giving defenders the speed and visibility needed to stop attacks before they escalate.
- **Security Consolidation at Scale**: The Falcon platform unifies endpoint, identity, cloud security, Next-Gen SIEM and IT automation, improving operational speed and eliminating the complexity and costs created by point products and stitched together platforms.
- **Built for the Modern SOC**: The Falcon platform is becoming the AI-native SOC for security teams, delivering automated security workflows, seamless response orchestration and end-to-end security integration. By reducing analyst workload and improving decision-making, the Falcon platform enables security teams to operate with speed and efficiency to stop breaches.

About CrowdStrike

CrowdStrike (NASDAQ: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.
