

CrowdStrike Introduces the Industry's First Fully-Managed Identity Threat Protection Solution, Powered by Falcon Complete

March 2, 2022

Expands Falcon Complete into one of the most critical areas of enterprise risk – identity

AUSTIN, Texas--(BUSINESS WIRE)--Mar. 2, 2022-- [CrowdStrike](#) Holdings, Inc. (Nasdaq: CRWD), a leader in cloud-delivered protection of endpoints, cloud workloads, identity and data, today introduced [Falcon Identity Threat Protection Complete](#), the industry's first fully-managed identity threat protection solution. It brings together the [Falcon Identity Threat Protection](#) module and [Falcon Complete](#) managed service to deliver identity threat prevention and IT policy enforcement, with expert management, monitoring and remediation. CrowdStrike was named as a Leader in the [IDC MarketScape: U.S. Managed Detection and Response Services 2021 Vendor Assessment](#)¹, and recognized as an MDR leader in [The Forrester Wave: Managed Detection and Response, Q1 2021](#).

With the rise of remote work, identity has become the new perimeter and attackers are increasingly targeting credentials to infiltrate an organization. According to the [2022 CrowdStrike Global Threat Report](#), nearly 80% of cyberattacks leverage identity-based attacks to compromise legitimate credentials and use techniques like lateral movement to quickly evade detection. Defending against identity-based attacks requires a mix of technology and human expertise, ensuring organizations can respond swiftly to these threats.

"Today's adversaries are amazingly adept at obtaining and abusing stolen credentials, taking advantage of blind spots in legacy systems, contractor systems and other unmanaged devices to gain a foothold into an organization and blend in undetected. This is increasingly problematic as it relates to ransomware campaigns. Organizations need to adapt their defenses to stay a step ahead of adversaries. As an MDR leader, CrowdStrike continues to innovate in the market to address the ever-evolving threat landscape. Falcon Identity Threat Protection Complete enables organizations to get full visibility into identity-based threats and respond to them in real-time, preventing attacks from progressing," said Thomas Etheridge, senior vice president, services at CrowdStrike.

With Falcon Identity Threat Protection Complete, organizations can run an effective and mature identity security program without the burden, costs and time associated with building one internally. Falcon Identity Threat Protection Complete enables organizations to:

- **Stop identity-driven attacks.** Receive automated protection and real-time detection from Falcon Identity Threat Protection, augmented with expert incident response from Falcon Complete, expediting the containment and eradication of identity threats.
- **Shrink their attack surface.** Get comprehensive visibility across all systems within an organization with identity monitoring, eliminating blind spots.
- **Get expert support.** CrowdStrike's experts learn an organization's identity protection needs, via an onboarding process, and immediately deploy policies aligned with best practices and their unique compliance, business and technical requirements.

Falcon Identity Threat Protection Complete is generally available for customers.

Breach Prevention Warranty

CrowdStrike stands strongly behind its breach protection capabilities. Falcon Complete comes with a Breach Prevention Warranty* to cover costs should a breach occur within the protected environment.

*Breach Prevention Warranty not available in all regions. See [FAQ](#) for other restrictions.

About CrowdStrike

[CrowdStrike](#) Holdings, Inc. (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with one of the world's most advanced cloud-native platforms for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment,

superior protection and performance, reduced complexity and immediate time-to-value.
