

CrowdStrike Ranks #1 Globally for Managed Detection and Response Market Share in Gartner® Report for Second Consecutive Year

May 16, 2023

AUSTIN, Texas--(BUSINESS WIRE)--May 16, 2023-- [CrowdStrike](#) (Nasdaq: CRWD) today announced that it ranked #1 for revenue for a second consecutive year in Managed Detection and Response (MDR) in the new Gartner® report: "Market Share: Managed Security Services, Worldwide, 2022."

Additionally, 88% of the top 25 vendors by market share have built their MDR services on top of CrowdStrike's platform – showcasing the [CrowdStrike Falcon platform](#) as the technology of choice for the global MDR partner ecosystem.

A pioneer of MDR, CrowdStrike's [industry-leading](#) MDR offering, [CrowdStrike Falcon Complete](#), helps customers of all sizes close the cybersecurity skills gap by providing end-to-end managed monitoring to reduce the time between alert and response and deliver unprecedented levels of protection. CrowdStrike Falcon Complete deploys rapidly, even during a crisis, to deliver immediate time-to-value, protecting endpoints through powerful AI, integrated threat intelligence and 24/7/365 support by elite cybersecurity professionals. As a result, security and IT teams can complement their staff and take advantage of best-in-class EDR and XDR to reduce the time between alert and response, and achieve unprecedented levels of protection.

"As the #1 MDR market leader and MDR pioneer, CrowdStrike has long been recognized as a trusted advisor and force multiplier for our customers," said Tom Etheridge, chief global services officer at CrowdStrike. "With an [estimated](#) 3.4 million shortfall of cybersecurity workers worldwide – and increasingly brazen and sophisticated adversaries – it has become incredibly challenging to staff and maintain a highly skilled security function that delivers sufficient, around-the-clock protection. With MDR, CrowdStrike and our partners bring together the best technology and human expertise to rapidly stop breaches and protect our customers' most critical areas of risk."

CrowdStrike continues to innovate in the managed services market. The company recently announced [CrowdStrike Falcon Complete XDR](#), which operationalizes XDR for customers of any security maturity and augments in-house teams of all skill levels to help them break down data and organizational silos to stop adversaries. CrowdStrike has also expanded its managed services offerings with [Falcon Complete LogScale](#), [Falcon Complete Cloud Security](#) and [Falcon Complete Identity Threat Protection](#).

About CrowdStrike

[CrowdStrike](#) (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with one of the world's most advanced cloud-native platforms for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
