

CrowdStrike is the Only Vendor Named as Overall Customers' Choice in 2024 Gartner Peer Insights™ Voice of the Customer for Vulnerability Assessment Report

AUSTIN, Texas--(BUSINESS WIRE)--Feb. 7, 2024-- [CrowdStrike](#) (Nasdaq: CRWD) today announced it has been recognized as the only Customers' Choice in the 2024 Gartner Peer Insights™ Voice of the Customer for Vulnerability Assessment among eight other providers. The AI-native CrowdStrike Falcon® XDR platform harnesses AI to prioritize risks in real time across the entire attack surface – both internal and external – without the complex, scanning infrastructure required by legacy vulnerability management providers.

Today's adversaries can weaponize vulnerabilities in minutes or hours as opposed to days or weeks. Reliance on the legacy, reactive approaches to vulnerability assessment can amplify organizational risk. [CrowdStrike Falcon® Exposure Management](#) unifies real-time security and IT data sets from Falcon Surface (External Attack Surface Management), Falcon Discover (Asset, Account and App Discovery) and Falcon Spotlight (Vulnerability Management), as well as CrowdStrike's renowned threat intelligence, endpoint and XDR telemetry to predict attack paths and guide risk mitigation actions that stop breaches before they happen.

"Reactive scan-first approaches to identifying and mitigating vulnerability risk are no longer good enough against today's adversary. Organizations need to proactively identify vulnerabilities and potential attack paths and shut them down before they can be exploited by fast moving adversaries," said Raj Rajamani, head of products at CrowdStrike. "Our unified platform approach stands out against the legacy vulnerability management companies and resonates with organizations that want to consolidate point products and stop vulnerabilities from turning into breaches."

CrowdStrike customer reviews include:

- "CrowdStrike Falcon Spotlight stands as a robust vulnerability management solution, rooted in the cloud, and enhanced by an integrated sensor that provides a comprehensive perspective of our enterprise's attack surface and the surrounding threat landscape. Furthermore, I've observed its user-friendly nature and seamless compatibility with various security solutions. In summary, this product is particularly well-suited for organizations seeking to augment their EDR solution with this valuable add-on feature." – [IT Security and Risk Manager in Media](#)
- "If you want to research, assess or report the vulnerabilities in your environment then go for Falcon Spotlight. One of the best tools I have ever used to overcome the challenges of vulnerability management. It supports all OS platforms and is real-time based." – [IT Leader in Manufacturing](#)
- "We have implemented the CrowdStrike Spotlight feature to gain better visibility into our vulnerabilities through CrowdStrike. It provides great prioritization for what vulnerabilities you should be prioritizing first if you do not know where to start." – [IT, Security and Risk Manager in Media](#)

About CrowdStrike

[CrowdStrike](#) (Nasdaq: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
