

CrowdStrike Named a Leader in the 2025 Gartner® Magic Quadrant™ for Endpoint Protection Platforms for Sixth Consecutive Time

July 17, 2025

CrowdStrike positioned furthest right for Completeness of Vision and highest for Ability to Execute among all vendors evaluated for third time in a row

AUSTIN, Texas--(BUSINESS WIRE)--Jul. 17, 2025-- [CrowdStrike](#) (NASDAQ: CRWD) today announced it has been named a Leader in the [2025 Gartner® Magic Quadrant™ for Endpoint Protection Platforms \(EPP\)](#) for the sixth consecutive time. For the third time in a row, CrowdStrike was positioned furthest right for Completeness of Vision and highest for Ability to Execute among all vendors evaluated.

The AI-native [CrowdStrike Falcon® platform](#) continues to define endpoint protection for the AI era, delivering industry-leading prevention, detection, and response. CrowdStrike's single-agent platform architecture meets growing customer demand to consolidate cybersecurity, unifying best-in-class endpoint, identity, cloud, data protection, and next-gen SIEM. With breakthrough agentic AI innovations, Falcon automates decisions and completes tasks to supercharge SOC personnel and accelerate security outcomes.

"As the pioneer of AI-native endpoint protection, CrowdStrike continues to lead the industry in delivering the outcome that matters most: stopping breaches," said Elia Zaitsev, chief technology officer, CrowdStrike. "The Falcon platform's unified architecture drives relentless innovation across the modern attack surface – consolidating point products, closing protection gaps, and simplifying operations. By wiring AI-driven automation into security workflows, Falcon autonomously makes critical decisions and drives real-time action, delivering the next evolution of AI-powered security operations. We believe this recognition validates Falcon as the platform of choice for modern cybersecurity."

Cybersecurity's Platform Innovator for the AI Era

CrowdStrike continues to innovate its endpoint and platform capabilities to keep customers ahead of evolving threats and transform security operations. The company recently unveiled File System Containment for endpoint, which prevents ransomware from spreading over the network via Windows Server Message Block (SMB) and stops mass encryption as early as possible. Agentic AI innovations – including [Charlotte AI Agentic Detection Triage](#) and [Charlotte AI Agentic Response and Agentic Workflows](#) – transcend 'ask-and-respond' co-pilots, delivering autonomous reasoning and action on first- and third-party data, without human prompts.

[Advancements](#) in Falcon Cloud Security protect every layer of cloud risk – from AI models to runtime data. Falcon Data Protection [innovations](#) unify data security across endpoints, cloud, GenAI, and SaaS. Falcon Identity Protection now secures [the entire identity attack lifecycle](#) – from initial access to privilege escalation and lateral movement – across hybrid environments. With every module managed from a single console, Falcon delivers AI-driven protection – trained on trillions of daily events and frontline intelligence – across the entire platform, without relying on stitched-together data or disconnected systems.²

In May 2025, CrowdStrike was [named](#) a Customers' Choice in the 2025 Gartner Peer Insights™ 'Voice of the Customer' for Endpoint Protection Platforms report, with the most 5-star ratings (450) of any Customers' Choice vendor.

About CrowdStrike

[CrowdStrike](#) (NASDAQ: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced

cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
