

CrowdStrike Named a Leader and Fast Mover in the 2025 GigaOm Radar Report for Identity Security Posture Management (ISPM)

July 23, 2025

GigaOm recognizes CrowdStrike for delivering the most complete platform, awarding top scores in non-human and machine identity protection, agentic detection triage, and automated response

AUSTIN, Texas--(BUSINESS WIRE)--Jul. 23, 2025-- [CrowdStrike](#) (NASDAQ: CRWD) today announced it has been named a Leader and Fast Mover in the [2025 GigaOm Radar Report for Identity Security Posture Management \(ISPM\)](#). The report recognized CrowdStrike as the most complete Platform Play, scoring highest of all vendors in Emerging Features, with perfect 5/5 scores in Non-Human and Machine Identities Posture and Generative AI for Identity Insights. CrowdStrike also received perfect 5/5 scores in Key Features and Business Criteria including Automated Remediation, Security Ecosystem Integration, and Scalability.

This recognition reinforces CrowdStrike's innovation and leadership in delivering a unified platform that protects every identity in the AI era – human and non-human – across the full attack lifecycle and hybrid environments.

According to GigaOm “**identity compromise remains one of the most common, easily exploited, and potentially damaging vectors for cyberattacks.**” As agentic AI drives explosive growth in machine and service identities, the AI-native [CrowdStrike Falcon@ platform](#) secures both human and non-human identities – delivering the real-time visibility, automation, and intelligence defenders need to stop identity-based threats before they escalate.

[CrowdStrike Falcon@ Identity Protection](#) continuously correlates telemetry across endpoints, identity providers, cloud infrastructure, and data protection tools – enriched with adversary intelligence and dark web monitoring. By combining these signals in real time, the Falcon platform detects credential misuse, lateral movement, and privileged escalation, highlights identity attack paths, and enforces policy controls through Falcon Fusion, CrowdStrike's no-code SOAR engine.

Key report findings include:

- **Machine and Non-Human Identity Protection:** With a perfect 5/5 score in Non-Human and Machine Identities Posture, CrowdStrike drives relentless innovation to keep customers ahead of evolving threats.
- **End-to-End Hybrid Identity Coverage:** The report highlighted how CrowdStrike secures the entire identity threat lifecycle and “**can protect hybrid identity infrastructures by detecting and responding to threats across on-premises and cloud identity infrastructures.**”
- **Agentic AI Innovation:** With a perfect 5/5 score in Generative AI for Identity Insights, CrowdStrike [brings the power of agentic AI](#) to Falcon Identity Protection. Charlotte AI Agentic Detection Triage autonomously triages cross-domain attack detections with over 98% accuracy¹ to rapidly prioritize the most critical threats.
- **Automated Response at Scale:** CrowdStrike earned a perfect 5/5 score in Automated Remediation. The report notes how “**the platform prevents and mitigates identity risks through policy enforcement and automated remediation utilizing the no-code SOAR engine Falcon Fusion,**” and that “**the solution can call on more than 150 automated actions.**”

“The AI era has led to an explosion in machine, service, and non-human identities, massively expanding the attack surface,” said Cristian Rodriguez, field CTO, Americas, CrowdStrike. “Adversaries are exploiting this shift to move faster, stay hidden, and breach environments through the front door: identity. As a unified part of the Falcon platform, Falcon Identity Protection is built for this new reality, correlating real-time signals across domains, applying agentic AI to triage and prioritize threats, and stopping identity-based attacks before they can escalate.”

¹ Accuracy rating is a measure of Charlotte AI triage decisions that match the expert decisions from the CrowdStrike Falcon Complete Next-Gen MDR team.

About CrowdStrike

[CrowdStrike](#) (NASDAQ: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon@ platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment,

superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
