

CrowdStrike Named the Overall Frost Radar™ Leader for SaaS Security Posture Management (SSPM) for the Second Consecutive Time

October 27, 2025

CrowdStrike ranked highest among all vendors in growth and innovation

AUSTIN, Texas--(BUSINESS WIRE)--Oct. 27, 2025-- [CrowdStrike](#) (NASDAQ: CRWD) today announced it has been named the overall Leader in the [2025 Frost Radar™ for SaaS Security Posture Management \(SSPM\)](#) for the second consecutive time, ranked highest of all vendors in growth and innovation.

This recognition underscores the competitive advantage of CrowdStrike's unified approach to SaaS security, securing every identity – human, non-human, and AI agent – to stop SaaS breaches and prevent cross-domain attacks. Frost highlighted that CrowdStrike's **“unified architecture that combines SaaS, endpoint, and identity data into a single console enables unmatched correlation and contextual risk insights across the entire security stack.”**

Key report findings and comments include:

Unified Human, Non-human, and AI Agent Protection

CrowdStrike “correlates identity security with SaaS telemetry to create unified profiles for HI (human identities) and NHI (non-human) ... and extends protection to emerging AI agent identities – all of which enhance security posture in increasingly complex SaaS environments.”

Securing SaaS with Agentic AI

Frost praised both how CrowdStrike secures AI agents, and leverages agentic AI for SaaS security with the [Charlotte AI](#) agentic system, stating “Charlotte AI allows users to write natural language queries, gain threat intelligence insights, and receive security guidance and automated analysis,” with sophisticated automated remediation.

Falcon Shield: The Center of SaaS

“Falcon Shield boasts an industry-leading ecosystem of more than 180 pre-built SaaS integrations, supported by a no-code Integration Builder that empowers customers to rapidly secure new or custom applications, ensuring seamless scalability and continuous protection.”

Go-to-Market Ecosystem Accelerates Market Leadership

“CrowdStrike leverages a combination of direct sales, an extensive partner network, strategic technology alliances, and its unique IR services ... these go-to-market strategies help the company stand out, accelerating permanent adoption and establishing leadership in the SSPM market.”

As SaaS environments grow more complex and AI agents expand the attack surface, organizations need a platform that delivers protection across identities, endpoints, cloud, and SaaS. The [Falcon® platform](#) unifies cross-domain protection to secure the modern enterprise and drive consolidation of legacy tools. [Falcon® Shield](#) provides complete SSPM, protecting identities, configurations, data, and agents across SaaS applications. Combined with [Falcon® Next-Gen Identity Security](#) and [Falcon® Cloud Security](#), CrowdStrike delivers end-to-end protection for every identity – human, non-human, and AI agent – from initial access to privilege escalation and lateral movement.

“Agentic AI is rewriting the SaaS threat landscape and how organizations defend it,” said Elia Zaitsev, chief technology officer at CrowdStrike. “Our consecutive Frost Radar recognition as the overall leader validates that CrowdStrike sets the standard for unified SaaS security in the agentic era.”

About CrowdStrike

[CrowdStrike](#) (NASDAQ: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment,

superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
