CrowdStrike Named a Customers' Choice in the 2026 Gartner Peer Insights™ 'Voice of the Customer' for Application Security Posture Management (ASPM) Tools Report

February 3, 2026

CrowdStrike named a Customers' Choice for ASPM, receiving the top customer rating for product capabilities and highest for deployment experience of all vendors evaluated

AUSTIN, Texas--(BUSINESS WIRE)--Feb. 3, 2026-- CrowdStrike (NASDAQ: CRWD) today announced its recognition as a Customers' Choice in the 2026 Gartner Peer Insights™ 'Voice of the Customer' for Application Security Posture Management (ASPM) Tools report.[1] CrowdStrike received the top customer ratings across product capabilities and highest rating for deployment experience of all the vendors evaluated. CrowdStrike eliminates application risk and consolidates cloud security at scale – reducing costs and complexity while stopping cloud breaches.

"As AI innovation expands the cloud attack surface, organizations need security they can trust at scale," said Elia Zaitsev, chief technology officer at CrowdStrike. "Being named a Customers' Choice reflects why customers choose CrowdStrike to eliminate the complexity of fragmented security approaches and stop breaches across the entire cloud estate from a single, unified platform."

What Customers Are Saying

Here is a sampling of our reviews:

- **Comprehensive ASPM Solution Delivering Clear Risks Insights and Effective Prioritization:** "Falcon ASPM offers a comprehensive approach to application security management. I have found the risk-based prioritization, asset visibility, and correlation of findings from multiple sources extremely useful. This helps reduce noise and gives a clearer picture of what needs attention." - IT Security and Risk Management, Travel and Hospitality Industry
- **Real-Time Visibility Into Application Risks Enables Stronger Cloud Native Security: "**CrowdStrike Falcon ASPM empowers IT leaders to proactively manage application security risk by continuously monitoring posture across development and production environments." - IT Associate, Miscellaneous
- **Enhances Application Security with Intelligent Risk Insights and Seamless DevSecOps Integration:** "The integration with existing DevSecOps tools is smooth & the ability to prioritize risk based on exploitability saves tremendous amounts of time for security and development teams." - Technical Manager, IT Services Industry

Why Our Customers Choose CrowdStrike

As part of Falcon® Cloud Security's unified CNAPP, Falcon® ASPM replaces fragmented application security tools with a unified approach that delivers real-time visibility, risk-based context, and runtime protection across modern cloud environments. Customers choose Falcon ASPM for:

- **End-to-End Visibility and Application Mapping:** Discover and map every running application, microservice, database, and API including software bill of materials (SBOM) to support compliance and identify software supply chain risk.
- **Business Risk Context:** Reduce up to 95% of vulnerability noise and automatically prioritize risks based on application reachability, potential impact, and business criticality.
- **Hybrid Cloud Protection:** As part of the Falcon® platform, customers can close the security gaps adversaries exploit by correlating signals across endpoint, identity, and cloud to expose potential attack paths and stop breaches before impact.

About CrowdStrike

CrowdStrike (NASDAQ: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators

of attack, threat intelligence, evolving adversary tradecraft and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity and immediate time-to-value.

CrowdStrike: We stop breaches.
