

CrowdStrike Advances Project QuiltWorks with Regional Partner Expertise Across North America

September 10, 2026

CDW, GuidePoint Security, Optiv, Presidio, and other leading partners bring specialized frontier readiness expertise and services to U.S. and Canadian customers

AUSTIN, Texas--(BUSINESS WIRE)--Sep. 10, 2026-- [CrowdStrike](#) (NASDAQ: CRWD) today announced the first geographic localization of [Project QuiltWorks](#), bringing together a dedicated North American partner cohort that delivers specialized frontier AI readiness expertise and remediation services for customers across the U.S. and Canada. Blackthorne Consulting, CDW, Consortium, Echelon Risk + Cyber, EVOTEK, GuidePoint Security, NETbuilder, Optiv, Pondurance, and Presidio are helping customers turn QuiltWorks findings into prioritized action and remediation.

The geographic localization marks the next phase of Project QuiltWorks. As the global QuiltWorks ecosystem continues to grow across technology, services, cloud infrastructure, and cyber insurance, CrowdStrike is regionalizing the program to connect customers with partners that bring the expertise, scale, and services required to address the unique needs of their markets.

"QuiltWorks is scaling globally. Now we're bringing that scale closer to customers," said Daniel Bernard, chief business officer at CrowdStrike. "The Crowd is our advantage. By combining CrowdStrike innovation with the local expertise and reach of our partners across the U.S. and Canada, we're giving customers more capacity to act on the AI risks that matter and a faster path from finding them to fixing them."

Global Scale. Regional Expertise.

Powered by frontier models from OpenAI and Anthropic, and open [Nemotron](#) models from NVIDIA, QuiltWorks combines CrowdStrike's AI-driven vulnerability discovery and adversary-informed prioritization with partner-led remediation, hardened cloud infrastructure from Amazon Web Services (AWS), and financial protection from leaders in the cyber insurance industry. More third-party security data now flows into [Falcon Next-Gen SIEM](#), extending visibility across customer environments and strengthening QuiltWorks vulnerability discovery. [Falcon IQ](#) puts those findings to work with partner services, attack narratives generation, investment priorities, and remediation roadmaps while enabling partners to scale expertise across customer environments.

Across the U.S. and Canada, Blackthorne Consulting, CDW, Consortium, Echelon Risk + Cyber, EVOTEK, GuidePoint Security, NETbuilder, Optiv, Pondurance, and Presidio bring differentiated expertise spanning assessment, architecture, engineering, offensive security, managed detection and response (MDR), security operations, and remediation. Together, they connect the scale of QuiltWorks with the practitioners customers trust to drive action.

For customers, the regional model means broader visibility into risk, faster prioritization, and greater access to specialized expertise and remediation capacity – bringing the full power of QuiltWorks closer to where they operate.

Supporting Partner Quotes

"With frontier AI models driving vulnerability discovery at a speed and volume never seen before, organizations can't protect everything equally. They need to understand where risk is concentrated, what matters most to the business and where investment will have the greatest impact. The QuiltWorks program brings that intelligence together with CDW's full-stack security and risk management expertise to help organizations translate technical findings into prioritized action backed by enterprise risk understanding – strengthening key outcomes like organizational resilience while getting more from their security investments."

– Stephanie Hagopian, senior vice president, security solutions, CDW

"Frontier models will uncover risk at a scale security teams can't address with traditional approaches. QuiltWorks combines CrowdStrike intelligence with GuidePoint's deep technical expertise to separate critical exposure from noise, focus resources on what matters, and move faster from discovery to remediation."

– Mark Thornberry, senior vice president, partnerships, GuidePoint Security

"Finding vulnerabilities faster only matters if organizations can fix them faster. QuiltWorks combines CrowdStrike's ability to identify and prioritize risk with Presidio's cybersecurity consulting and remediation expertise, helping customers turn a growing volume of findings into measurable risk reduction."

– Jim Finn, vice president, cyber security sales, Presidio

About CrowdStrike

[CrowdStrike](#) (NASDAQ: CRWD), a global cybersecurity leader, has redefined modern security with the world's most advanced cloud-native platform for protecting critical areas of enterprise risk – endpoints and cloud workloads, identity and data.

Powered by the CrowdStrike Security Cloud and world-class AI, the CrowdStrike Falcon® platform leverages real-time indicators of attack, threat intelligence, evolving adversary tradecraft, and enriched telemetry from across the enterprise to deliver hyper-accurate detections, automated protection and remediation, elite threat hunting, and prioritized observability of vulnerabilities.

Purpose-built in the cloud with a single lightweight-agent architecture, the Falcon platform delivers rapid and scalable deployment, superior protection and performance, reduced complexity, and immediate time-to-value.
