# CrowdStrike Positioned as a Leader in the Gartner Magic Quadrant for Endpoint Protection Platforms

August 23, 2019

**CROWDSTRIKE POSITIONED AS A LEADER IN THE GARTNER MAGIC QUADRANT FOR ENDPOINT PROTECTION PLATFORMS**

*CrowdStrike Positioned Furthest for Completeness of Vision in Entire Magic Quadrant*

CrowdStrike® Inc. (Nasdaq: CRWD), a leader in cloud-delivered endpoint protection, today announced it has been positioned by Gartner, Inc. in the Leaders quadrant of the "Magic Quadrant for Endpoint Protection Platforms." [i] The report, which evaluates vendors based on completeness of vision and their ability to execute, positioned CrowdStrike furthest for completeness of vision in the entire Magic Quadrant.

According to Gartner's "Forecast Analysis: Information Security and Risk Management, Worldwide, 4Q18 Update," the worldwide EPP (enterprise) software market is expected to grow from $6.5 billion in 2019, to $7.5 billion by 2022.[ii]

"We believe CrowdStrike's position in the Leaders quadrant validates that our cloud-native model empowers the delivery of endpoint security services at a pace and scale that meets the needs of modern, distributed businesses," said George Kurtz, chief executive officer and co-founder of CrowdStrike. "We started CrowdStrike from the ground up in the cloud to provide a radically new approach to security and solve the problems faced by modern businesses using fossilized, disparate solutions deemed ineffective in the cloud era. Our placement as furthest for completeness of vision confirms the value proposition that our platform approach and single-agent architecture offers our customers in stopping breaches, while also reducing complexity and security sprawl."

The CrowdStrike Falcon Platform is the first and only modern, scalable single-agent EPP platform that provides a sophisticated, yet easy user experience for the enterprise and stops cyber breaches. It offers next-generation AV, endpoint detection and response (EDR), managed threat hunting, IT hygiene, threat intelligence and vulnerability management, all via a single lightweight agent that is rapidly deployable and delivers a seamless experience for security teams and end-users. Falcon's cloud-based modular architecture promotes innovation and provides customers frictionless enablement of new features and functionality in a true platform experience.

CrowdStrike Falcon customers can prevent attacks on endpoints on or off the network with the power of crowdsourced data that delivers cloud-scale artificial intelligence (AI) with real-time protection and visibility across the enterprise, including at the firmware level. The CrowdStrike Threat Graph® enables the CrowdStrike Falcon to unlock the power of this data and correlate over two trillion endpoint-related events per week in real time from across the globe, fueling one of the world's most advanced data platforms for security.

In the past year, CrowdStrike has brought significant innovation to its Falcon platform. In March, Falcon for Mobile, the first endpoint detection and response solution for mobile devices, was announced. Falcon for Mobile is the only comprehensive tool that enables proactive threat identification and response, and incident investigation, on Android and iOS mobile devices. The CrowdStrike Store was announced in February of 2019, an enterprise marketplace where customers can try and deploy trusted applications.

**About CrowdStrike**

CrowdStrike® Inc., a global cybersecurity leader, is redefining security for the cloud era with an endpoint protection platform built from the ground up to stop breaches. The CrowdStrike Falcon® platform's single lightweight-agent architecture leverages cloud-scale artificial intelligence (AI) and offers real-time protection and visibility across the enterprise, preventing attacks on endpoints on or off the network. Powered by the proprietary CrowdStrike Threat Graph®, CrowdStrike Falcon correlates over two trillion endpoint-related events per week in real time from across the globe, fueling one of the world's most advanced data platforms for security.

With CrowdStrike, customers benefit from better protection, better performance and immediate time-to-value delivered by the cloud-native Falcon platform.

There's only one thing to remember about CrowdStrike: We stop breaches.

Qualifying organizations can gain full access to Falcon Prevent™ by starting a free trial.
