CrowdStrike Falcon® Intelligence Recon+ Expands Unmatched Threat Intelligence Suite, Delivering Managed Protection Against Dark Web Threats and Digital Risk

July 28, 2021

CrowdStrike expands fast-growing threat intelligence leadership with new offering to help organizations proactively hunt threat actors looking for opportunities to exploit their brand, steal their data and gain unauthorized access.

SUNNYVALE, Calif.--(BUSINESS WIRE)--Jul. 28, 2021-- CrowdStrike Inc., a leader in cloud-delivered endpoint protection and workload protection, today announced Falcon X Recon+, a new managed solution that simplifies the process of hunting and mitigating external threats to brands, employees and sensitive data. Falcon X Recon+ threat experts manage digital risk protection efforts by monitoring, triaging, assessing and responding to threats across the criminal underground, enabling the customer to focus solely on their business.

Earlier this year, CrowdStrike delivered Falcon X Recon ™ to expose activity on the cybercriminal underground. Falcon X Recon+ combines the effectiveness of the Falcon X Recon technology with the skills and experience of the CrowdStrike Intelligence team. By offloading the effort of mitigating external threats to CrowdStrike, Falcon X Recon+ increases the effectiveness of the security team, while reducing the time, skills and effort required to battle sophisticated adversaries.

Falcon X Recon+ experts monitor, on the customer's behalf, data from thousands of restricted forums, marketplaces, messaging platforms, social media posts, data leak sites and much more, to provide relevant, real-time warnings, identifying data exposure and threats to the enterprise. CrowdStrike experts then quickly identify, investigate and recommend mitigation actions including the potential take-down of posts and impersonations that may be harmful to the brands or reputations. The experts at CrowdStrike bring global awareness to these issues and are better positioned to empower security professionals, leveraging CrowdStrike's powerful telemetry, expert analysis and critical resources.

Key features of Falcon X Recon+ include:

Unrivaled Coverage and Expertise: Falcon X Recon+ provides unrivaled visibility into cybercriminal activity that goes beyond the internet to include Internet Relay Chat (IRC), botnet and DDoS configurations and messaging applications. Once our experts identify a potential threat to an organization, they have access to the vast resources available from CrowdStrike's global team of intelligence analysts to aid them in adding context to an investigation, in order to recommend proactive steps to prevent and detect future threats.

Takedowns: Falcon X Recon+ experts continuously hunt for potential external threats to organizations, keeping customers updated on verified threats, and recommending effective mitigation steps to proactively stop future attacks. CrowdStrike works on the customer's behalf to identify and facilitate the take down of fraudulent accounts, phishing websites, domains and malicious posts that potentially harm reputation or business.

Reports and Briefings: Monthly reports provide visibility into the day-to-day activity that CrowdStrike performs on behalf of the customer, including trends, insights and significant events. In addition, customers are invited to the CrowdStrike Quarterly Threat Brief, where our experts provide insight into current and trending activity across the threat landscape.

"Threat actors are becoming more brazen in their methods of attacking supply chains and deploying sophisticated ransomware campaigns. Providing visibility into the tactics and techniques of the cybercriminal underground is no longer just a technology problem, but also requires human expertise," said Adam Meyers, senior vice president of intelligence, CrowdStrike. "With Falcon X Recon+, CrowdStrike alleviates the time and effort needed to detect, investigate and mitigate external threats, so our customers can spend their valuable time and resources focused on their business."

Forward-Looking Statements

This press release contains forward-looking statements that involve risks and uncertainties, including statements regarding benefits of the CrowdStrike Falcon platform and CrowdStrike's Falcon X Recon+ solution. There are a significant number of factors that could cause actual results to differ materially from statements made in this press release.

You should not rely on these forward-looking statements, as actual outcomes and results may differ materially from those anticipated or implied by these forward-looking statements as a result of such risks and uncertainties. All forward-looking statements in this press release are based on information available to us as of the date hereof, and we do not assume any obligation to update the forward-looking statements provided to reflect events that occur or circumstances that exist after the date on which they were made.

About CrowdStrike

CrowdStrike, a global cybersecurity leader, is redefining security for the cloud era with an endpoint and workload protection platform built from the ground up to stop breaches. The CrowdStrike Falcon® platform's single lightweight-agent architecture leverages cloud-scale artificial intelligence (AI) and offers real-time protection and visibility across the enterprise, preventing attacks on endpoints and workloads on or off the network. Powered by the proprietary CrowdStrike Threat Graph®, CrowdStrike Falcon correlates approximately 6 trillion endpoint-related events per week in real time from across the globe, fueling one of the world's most advanced data platforms for security.

With CrowdStrike, customers benefit from better protection, better performance and immediate time-to-value delivered by the cloud-native Falcon platform.

There's only one thing to remember about CrowdStrike: We stop breaches.

Qualifying organizations can gain full access to Falcon Prevent™ by starting a free trial.
