

Explanation of Non-GAAP Financial Measures

In addition to our results determined in accordance with U.S. generally accepted accounting principles (“GAAP”), we believe the following non-GAAP measures are useful in evaluating our operating performance. We use the following non-GAAP financial information to evaluate our ongoing operations and for internal planning and forecasting purposes. We believe that non-GAAP financial information, when taken collectively, may be helpful to investors because it provides consistency and comparability with past financial performance and facilitates period-to-period comparisons of operations, as these measures eliminate the effects of certain variables unrelated to our overall operating performance. However, non-GAAP financial information is presented for supplemental informational purposes only, has limitations as an analytical tool, and should not be considered in isolation or as a substitute for financial information presented in accordance with GAAP.

Other companies, including companies in our industry, may calculate similarly titled non-GAAP measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of our non-GAAP financial measures as tools for comparison.

Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures and not rely on any single financial measure to evaluate our business.

Non-GAAP Subscription Gross Profit and Non-GAAP Subscription Gross Margin

We define non-GAAP subscription gross profit and non-GAAP subscription gross margin as GAAP subscription gross profit and GAAP subscription gross margin, respectively, excluding stock-based compensation expense, and amortization of acquired intangible assets.

Non-GAAP Income from Operations

We define non-GAAP income from operations as GAAP income (loss) from operations excluding stock-based compensation expense, amortization of acquired intangible assets (including purchased patents), acquisition-related expenses (credits), net, mark-to-market adjustments on deferred compensation liabilities, and legal reserve and settlement charges or benefits.

Non-GAAP Net Income Attributable to CrowdStrike

We define non-GAAP net income attributable to CrowdStrike as GAAP net income (loss) attributable to CrowdStrike excluding stock-based compensation expense, amortization of acquired intangible assets (including purchased patent), acquisition-related expenses (credits), net, amortization of debt issuance costs and discount, mark-to-market adjustments on deferred compensation liabilities, legal reserve and settlement charges or benefits, acquisition-related provision (benefit) for income taxes, losses (gains) and other income from strategic investments, losses (gains) on deferred compensation assets, and the tax costs for intellectual property integration relating to acquisitions.

Non-GAAP Net Income per Share Attributable to CrowdStrike Common Stockholders, Basic and Diluted

We define non-GAAP net income per share attributable to CrowdStrike common stockholders, as non-GAAP net income attributable to CrowdStrike common stockholders divided by the weighted-average shares outstanding, which includes the dilutive effect of potentially dilutive common stock equivalents outstanding during the period.

Free Cash Flow

Free cash flow is a non-GAAP financial measure that we define as net cash provided by operating activities less purchases of property and equipment, capitalized internal-use software and website development, and purchases of deferred compensation investments. We monitor free cash flow as one measure of our overall business performance, which enables us to analyze our future performance without the effects of non-cash items and allow us to better understand the cash needs of our business. While we believe that free cash flow is useful in evaluating our business, free cash flow is a non-GAAP financial measure that has limitations as an analytical tool, and free cash flow should not be considered as an alternative to, or substitute for, net cash provided by operating activities in accordance with GAAP. The utility of free cash flow as a measure of our liquidity is further limited as it does not represent the total increase or decrease in our cash balance for any given period. In addition, other companies, including companies in our industry, may calculate free cash flow differently or not at all, which reduces the usefulness of free cash flow as a tool for comparison.

Explanation of Operational Measures

Annual Recurring Revenue

ARR is calculated as the annualized value of our customer subscription contracts as of the measurement date, assuming any contract that expires during the next 12 months is renewed on its existing terms. To the extent that we are negotiating a renewal with a customer after the expiration of the subscription, we continue to include that revenue in ARR if we are actively in discussion with such an organization for a new subscription or renewal, or until such organization notifies us that it is not renewing its subscription.

Magic Number

Magic Number is calculated by performing the following calculation for the most recent four quarters and taking the average: annualizing the difference between a quarter's Subscription Revenue and the prior quarter's Subscription Revenue, and then dividing the resulting number by the previous quarter's Non-GAAP Sales & Marketing Expense. Magic Number = Average of previous four quarters: $((\text{Quarter Subscription Revenue} - \text{Prior Quarter Subscription Revenue}) \times 4) / \text{Prior Quarter Non-GAAP Sales \& Marketing Expense}$.

Free Cash Flow Rule of 40

Free cash flow rule of 40 is calculated by taking the current quarter total revenue year over year growth rate percentage and summing it with the current quarter free cash flow margin percentage.

(1) We use our GAAP provision for income taxes for the purpose of determining our non-GAAP income tax expense. The tax costs for intellectual property integration relating to acquisitions are included in the GAAP provision for income taxes. The income tax benefits related to stock-based compensation, amortization of acquired intangible assets (including purchased patents), acquisition related expenses, amortization of debt issuance costs and discount, losses (gains) and other income from strategic investments attributable to CrowdStrike, mark-to-market adjustments on deferred compensation liabilities, gains on deferred compensation assets, and legal reserve and settlement charges included in the GAAP provision for income taxes were not material for all periods presented.

(2) For periods in which we had diluted non-GAAP net income per share attributable to CrowdStrike common stockholders, the sum of the impact of individual reconciling items may not total to diluted Non-GAAP net income per share attributable to CrowdStrike common stockholders because of rounding differences or because the basic share counts used to calculate GAAP net loss per share attributable to CrowdStrike common stockholders differ from the diluted share counts used to calculate non-GAAP net income per share attributable to CrowdStrike common stockholders. The GAAP net loss per share attributable to CrowdStrike common stockholders calculation uses a lower share count as it excludes dilutive shares which are included in calculating the non-GAAP net income per share attributable to CrowdStrike common stockholders.
